

Wager Exchange

Increasing your
connection with
players even further.

A new option for how players can use their points, enhancing
the player experience.

Available in New South Wales.

Wager Exchange allows players to convert their points to credits.

Wager Exchange's process is simple, making it easier for players to interact and easily see their points convert to credits. Choosing Wager Exchange for your venue will improve player retention by providing your venue with a competitive advantage and giving your players a new way to play.

Wager Exchange allows your players to convert gaming points to credits, which may increase turnover, average bets and player retention.

Through Metropolis, Wager Exchange is enabled with operator selectable functions allowing for presentation consistency, managing the minimum qualifying level, transfer amount and group eligibility.

Once the operator parameters are selected, players can access their points and convert them to gaming machine credits through the pathway LCD screen. This format minimises button pressing and displays credits as they transfer.

When the minimum qualifying level is reached, the Wager Exchange button appears on screen and the player can select it. The player can convert up to \$50 a day through either single or multiple transactions within their point balance.

Once completed, the pathway screen will return to the home screen with an updated value of credits and stream promotions and advertising. Unused credits at the end of the day, will convert back to points.

Wager Exchange process can be displayed, ensuring players can see their points exchanging to credits.

Get the most out of Wager Exchange.

Access summary reports for Wager Exchange activity through Astute BI Metropolis online reporting.

Various options for Wager Exchange settings to suit your venues preferences.

Provision of marketing material to support in venue promotion.
